PROFESSIONAL SUMMARY

Full-Stack Developer (MERN + Next.js) with 2+ years of experience designing, building, and shipping production web applications, now expanding into Generative AI and Agentic AI development. Proven track record building RAG pipelines, LLM-powered tools, and multi-agent workflows, backed by a Databricks Certified Data Engineer Associate credential and a Generative AI Engineer Associate certification. Delivered 10+ real-world platforms spanning startup acceleration, ed-tech, AI-first recruitment, and open-source tooling.

KEY HIGHLIGHTS

- 2+ years shipping production MERN applications within a 4-member engineering team, delivering 500+ REST API endpoints
- Engineered HyrDragon's backend to reliably support 600 concurrent users during peak usage
- Built RAG pipelines and LLM-powered tooling (LangChain, Gemini API, FAISS), backed by a Databricks Certified Data Engineer Associate credential
- Shipped 11 full-stack and AI-powered projects spanning startup acceleration, ed-tech, and AI-first recruitment

PROFESSIONAL EXPERIENCE

Software Associate
SNS Square • Coimbatore, India | Sep 2025 – Present

- Collaborate within a 4-member engineering team, owning full-stack features end-to-end using React.js, Redux.js, Node.js, Express, and MongoDB
- Designed and integrated 500+ RESTful API endpoints and backend services powering dynamic, data-driven front-end experiences
- Build responsive, reusable UI components and manage application state with React.js and Redux.js
- Participate in code reviews and agile ceremonies (sprint planning, standups) using Git to maintain code quality and delivery velocity

Technologies: React.js, Redux.js, Node.js, Express, MongoDB, Git

Junior Software Associate
SNS Square • Coimbatore, India | Jul 2024 – Sep 2025

- Built full-stack features end-to-end on the MERN stack, from MongoDB schema design through Express/Node.js APIs to React.js UI
- Implemented JWT-based user authentication and MongoDB data integration to ship production-ready features
- Designed responsive, state-driven front-end interfaces with React.js and Redux.js, translating design specs into reusable components
- Worked within Git/GitHub version control and Visual Studio in a collaborative, code-reviewed development environment

Technologies: MERN Stack, React.js, Redux.js, Node.js, Express.js, MongoDB, Git, GitHub

PROJECTS

Startzy — *Startup Accelerator*

- Comprehensive platform for startup acceleration, supporting funding workflows for early-stage founders
- Built streamlined onboarding flows and funding modules end-to-end with Next.js, Node.js, Express, and MongoDB

Stack: Next.js, Node.js, Express, MongoDB | www.startzyai.com/

HyrDragon — *AI-First Hiring Platform*

- AI-first recruitment platform for automated skill matching, resume analysis, and interview evaluation
- Engineered the backend to reliably support 600 concurrent users, with coding tests, AI chatbot interviews, and proctoring modules

Stack: React, Node.js, Express, MongoDB, Python | hyrdragon.digitaldiffuse.in/

Milai.ai — *Career Upskilling*

- Learning and assessment platform for candidate upskilling
- Developed skill-gap analysis, interview bots, and coding challenge modules end-to-end

Stack: React, Node.js, Express, MongoDB | milai.ai/

Dragon Suite — *AI Exam Prep & Placement Platform*

- 20-module super app spanning exam prep, placement readiness, and AI-driven candidate assessment
- Delivered full-stack modules for students, recruiters, and colleges using React, Node.js, Express, and MongoDB

Stack: React, Node.js, Express, MongoDB | www.1000dragons.ai/

JEE/NEET MCQ Generator — *RAG-Powered Question Generation*

- AI application generating JEE/NEET practice MCQs using Retrieval-Augmented Generation (RAG)
- Built OCR-based content ingestion and a FAISS-powered searchable knowledge base with the Gemini API

Stack: Python, Streamlit, Gemini API, FAISS, Tesseract OCR | github.com/pradee2601/Question-Extraction

Additional Projects: EdCom (Student Admission Portal), FoodAccess (Food Security Platform), Student Placement Predictor (ML Salary & Placement Predictor), Agentic AI Workshop (LangChain notebooks), Fullstack Playground, and Learning Sandbox — full details and code at github.com/pradee2611.
